Office Action Summary	Examiner	Art Unit			
	Dung (Michael) T. Nguyen	2828			
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).  Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).					
Status					
1) Responsive to communication(s) filed on 12 Ju	<u>ine 2007</u> .	, i			
· <u> </u>	,—				
3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is					
closed in accordance with the practice under E	x paπe Quayle, 1935 C.D. 11, 4:	53 O.G. 213.			
Disposition of Claims					
4) Claim(s) 78,81,87,89,90,93,97,99 and 100 is/are pending in the application.					
4a) Of the above claim(s) is/are withdrawn from consideration.					
5) Claim(s) is/are allowed.					
6)⊠ Claim(s) <u>78,81,87,89,90,93,97,99 and 100</u> is/are rejected.					
7) Claim(s) is/are objected to.	r election requirement				
8) Claim(s) are subject to restriction and/or election requirement.					
Application Papers					
9) The specification is objected to by the Examine					
10) ☐ The drawing(s) filed on is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.					
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).					
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).  11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.					
Priority under 35 U.S.C. § 119					
12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of:					
1. Certified copies of the priority documents have been received.					
2. Certified copies of the priority documents have been received in Application No					
3. Copies of the certified copies of the priority documents have been received in this National Stage					
application from the International Bureau (PCT Rule 17.2(a)).					
* See the attached detailed Office action for a list of the certified copies not received.

#### **DETAILED ACTION**

### Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 78, 87, 89, 93, 97, 99-100 are rejected 35 U.S.C. 103(a) as being unpatentable over Asami et al. (5415978) in view of Byer et al. (5036220).

With respect to claims 78, 87, 89, 93, 97, Asami et al. show in Fig.2-6 a laser device, comprising:

three laser light sources (54R, 54G, and 54B) for generating red, green and blue laser light beams (Lr, Lg, and Lb);

a modulator (58R, 58G, and 58B) for changing an intensity of each of the laser light beams; and

a deflector (68) for changing a direction of each of the laser light beams,

wherein at least one of the three laser light sources is formed of a semiconductor laser (102) for radiating laser light and a bulk type (material mass) optical wavelength conversion element (110) having periodic domain inverted structures (column 19, lines 26-30) for generating a harmonic wave (column 6, lines 12-15).

Asami et al. lack a single mode fiber for conveying laser light from the semiconductor laser to the wavelength conversion element and wherein the single mode fiber is configured to

prevent a variation in temperature of the wavelength conversion element caused by a heat generated from the semiconductor laser.

Byer teach in fig. 1 a single mode fiber 17 for conveying laser light from the semiconductor laser to the wavelength conversion element 11 and wherein the single mode fiber is configured to prevent a variation in temperature of the wavelength conversion element caused by a heat generated from the semiconductor laser, the semiconductor laser being remote from the wavelength conversion element (As indicated in the instant application on page 55, 1.15-19 to prevent temperature variation by remotely disposing the wavelength conversion element away from the heat generated by the semiconductor laser, Byer teach exactly that feature in Fig.1).

it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide Asami et al. what is taught by Byer to efficiently couple the laser light into the wavelength conversion element.

Claims 99-100, Asami Fig.1-2 disclose the semiconductor laser is fixed in a housing without active cooling.

Claims 81 and 90 are rejected under 35 U.S.C. 103(a) as being unpatentable over Asami et al. (5415978) in view of Byer et al. (5036220) and further in view of Nitta (5590145).

With respect to claims 81 and 90, Asami et al. and Byer disclose all limitations of the claims 78 and 87 except for the semiconductor laser is a distributed feedback type semiconductor laser; and the laser light source further comprises a semiconductor laser amplifier for amplifying the laser light from the distributed feedback type semiconductor laser.

Application/Control Number: 10/712,635

Art Unit: 2828

Nitta teaches in Fig. 1 the semiconductor laser (1) is a distributed feedback type semiconductor laser; and the laser light source further comprises a semiconductor laser amplifier (3) for amplifying the laser light from the distributed feedback type semiconductor laser (column 3, lines 26-64).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide Asami et al. and Byer what is taught by Nitta to employ a semiconductor laser being able to switch the output laser light between TE and TM mode (polarization plane) and a semiconductor laser amplifier for amplifying the semiconductor laser output light to minimize the optical losses (column 1, lines 56-67; column 2, lines 1-3; and column 3, lines 26-64).

### Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 2828

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

## **Communication Information**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dung (Michael) T Nguyen whose telephone number is (571) 272-1949. The examiner can normally be reached on 8:30 - 17:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Min Harvey can be reached on (571) 272-1835. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 306-3329.

Jung Michael Dung Nguyen
